SHERPA HUNTING UNVEILS A REVOLUTIONARY GAME CART CONVERSION KIT FOR SUMMIT, API AND OL' MAN BRAND TREESTANDS

Glen Alpine, North Carolina – Sherpa Game Carts:

Sherpa Hunting breaks new ground with a first-of-its-kind game cart conversion kit for climbing treestands. The revolutionary kit converts all modern Summit, API and Ol Man brand climbing treestands into a game cart in under two minutes. Models for additional manufacturer's tree stands are in the works with expected release dates in early 2015.

Weighing in at just over 10 pounds the Sherpa Game Cart is capable of carrying 250 pounds of weight.

It is a game changer for hunters on public land without the benefit of 4-wheeler or motorized vehicle access. Its compact size and light weight mean that hunters can take it with them wherever they go.

The patent pending technology is a break-through in efficiency for modern treestand hunters. The kit doubles as an effective tool for rolling a stand and gear into the woods for aging hunters or those with long hikes. It is also an excellent resource to prevent the #1 cause of

hunting related deaths, heart attacks while hunters drag deer out of the woods.

With a retail price of just \$99.97 the Sherpa Game Cart is a natural add on sale to any Summit, API or Ol' Man treestand purchase. All Sherpa Game Carts are designed, built, tested and approved in the U.S.A. They come standard with a one year warranty and are available for purchase from

www.SherpaHunting.com,
Amazon.com and dealers around the country.

Stop dragging your deer and start rolling them out. Hunt Smarter with Sherpa!
